Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 293, Nos. 1 & 2, December 2006

M. Hashimoto, S. Hossain and O. Shido: Docosahexaenoic acid but not eicosapentaenoic acid withstands dietary cholesterol-induced decreases in platelet membrane fluidity 1–8

K. Barrett, D. McGrowder, P. Brown and D. Ragoobirsingh: Increased PC-1 phosphodiesterase activity and inhibition of glucose uptake in adipocytes of type 2 diabetic rats 9–14

V. Batra, V. Kesavan and K.P. Mishra: Modification of p53 protein profile by gamma irradiation followed by methyl donor starvation 15–21

F. Novák, E. Tvrzická, B. Hamplová, F. Kolář and O. Nováková: Postnatal development of phospholipids and their fatty acid profile in rat heart 23–33

R.S. Villarreal, S.E. Alvarez, M.J. Ayub and G.M. Ciuffo: Angiotensin II modulates tyr-phosphorylation of IRS-4, an insulin receptor substrate, in rat liver membranes 35–46

O. Yokoyama, M. Kumashiro, A. Iriki and H. Ishibashi: Tactile stimulation-induced rapid elevation of the synaptophysin mRNA expression level in rat somatosensory cortex 47–52

M.E. Obrenovich, X. Fan, M. Satake, S.M. Jarvis, L. Reneker, J.R. Reddan and V.M. Monnier: Relative suppression of the sodium-dependent Vitamin C transport in mouse versus human lens epithelial cells 53–62

T. Kojima, K.-i. Nakahama, K. Yamamoto, H. Uematsu and I. Morita: Age- and cell cycle-dependent changes in EPC-1/PEDF promoter activity in human diploid fibroblast-like (HDF) cells 63–69

J. Radovan, P. Vaclav, W. Petr, C. Jan, A. Michal, P. Richard and P. Martina: Changes of collagen metabolism predict the left ventricular remodeling after myocardial infarction 71–78

J. Cubero, V. Valero, D. Narciso, M. Rivero, J.M. Marchena, A.B. Rodríguez and C. Barriga: L-Tryptophan administered orally at night modifies the melatonin plasma levels, phagocytosis and oxidative metabolism of ringdove (*Streptopelia roseogrisea*) heterophils 79–85

P.Y. Chiu, H.Y. Leung, M.K.T. Poon, S.S.T. Lee and K.M. Ko: Schisandrin B induced antioxidant response is partly mediated by cytochrome P-4502E1 catalyzed reaction in mouse liver 87–92

P. Perez-Pinera, M. Menendez-Gonzalez, M. del Valle and J.A. Vega: Sodium chloride regulates Extracellular Regulated Kinase 1/2 in different tumor cell lines 93–101

W.R. Gower Jr., G.M. Carter, Q. McAfee and S.M. Solivan: Identification, regulation and anti-proliferative role of the NPR-C receptor in gastric epithelial cells 103–118

S.D. Ray, N. Patel, N. Shah, A. Nagori, A. Naqvi and S.J. Stohs: Pre-exposure to a novel nutritional mixture containing a series of phytochemicals prevents acetaminophen-induced programmed and unprogrammed cell deaths by enhancing BCL-XL expression and minimizing oxidative stress in the liver 119–136

I. Wakamatsu, S. Ihara and Y. Fukui: Mutational analysis on the function of the SWAP-70 PH domain 137–145

F.L. Forti, M.H.S. Dias and H.A. Armelin: ACTH receptor: Ectopic expression, activity and signaling 147–160

D. Zhang, H. Lu, J. Li, X. Shi and C. Huang: Essential roles of ERKs and p38K in up-regulation of GST A1 expression by Maotai content in human hepatoma cell line Hep3B 161–171

S.H. Parker, T.A. Parker, K.S. George and S. Wu: The roles of translation initiation regulation in ultraviolet light-induced apoptosis 173–181

B. Balabanlı, N. Türközkan, M. Akmansu and M. Polat: Role of free radicals on mechanism of radiation nephropathy 183–186

A.P.M. Nunes, J.C.P. De Mattos, S.C. Ferreira-Machado, R.M. Nunes, N.R. Asad, F.J.S. Dantas, R.J.A.C. Bezerra and A. Caldeira-de-Araujo: Biological effects of stevioside on the survival of *Escherichia coli* strains and plasmid DNA 187–192

M.A. Patel and S.S. Katyare: Treatment with dehydroepiandrosterone (DHEA) stimulates oxidative energy metabolism in the liver mitochondria from developing rats 193–201

I.M. Melek, S. Erdogan, S. Celik, O. Aslantas and T. Duman: Evaluation of oxidative stress and inflammation in long term *Brucella melitensis* infection 203–209

N. Kamalakkannan and P.S.M. Prince: Rutin improves the antioxidant status in streptozotocin-induced diabetic rat tissues 211–219
